Diesel generator set

QSB5 series engine

50-125 kW @ 60Hz
EPA Tier 3 emissions

Description
Cummins Power Generation generator sets are fully integrated power generation systems providing optimum performance, reliability and versatility for stationary standby applications.

Features

Heavy Duty Engine - Rugged 4-cycle industrial diesel delivers reliable power and fast response to load changes.

Alternator - Several alternator sizes offer selectable motor starting capability with low reactance 2/3 pitch windings, low waveform distortion with non-linear loads and fault clearing short-circuit capability.

Control system - The PowerCommand® 2.3 electronic control is standard equipment and provides total generator set system integration including automatic remote starting/STOPping, precise frequency and voltage regulation, alarm and status message display, output metering, auto-shutdown at fault detection and NFPA 110 Level 1 compliance.

Cooling system - Standard cooling package provides reliable running at up to 50 °C (122 °F) ambient temperature.

Enclosures - The aesthetically appealing enclosure incorporates special designs that deliver one of the quietest generators of its kind. Aluminum material plus durable powder coat paint provides the best anti-corrosion performance. The generator set enclosure has been designed to withstand 180 MPH wind loads in accordance with ASCE7-10. The design has hinged doors to provide easy access for service and maintenance.

Fuel tanks - Dual wall sub-base fuel tanks are offered as optional features, providing economical and flexible solutions to meet extensive code requirements on diesel fuel tanks.

NFPA - The generator set accepts full rated load in a single step in accordance with NFPA 110 for Level 1 systems.

Warranty and service - Backed by a comprehensive warranty and worldwide distributor and dealer network.

Generator set specifications

Governor regulation class | ISO 8528 Part 1 Class G3
Voltage regulation, no load to full load | ± 1.0%
Random voltage variation | ± 1.0%
Frequency regulation | Isochronous
Random frequency variation | ± 0.50%
Radio frequency emissions compliance | FCC code title 47 part 15 class A and B

Engine specifications

Design | Turbocharged and charge air cooled
Bore | 107 mm (4.21 in)
Stroke | 124 mm (4.88 in)
Displacement | 4.5 liters (272 in³)
Cylinder block | Cast iron, in-line 4 cylinder
Battery capacity | 850 amps per battery at ambient temperature of 0 °C (32 °F)
Battery charging alternator | 100 amps
Starting voltage | 2x12 volt in parallel, negative ground
Lube oil filter type(s) | Spin-on with relief valve
Standard cooling system | High ambient radiator
Rated speed | 1800 rpm

Alternator specifications

Design | Brushless, 4 pole, drip proof, revolving field
Stator | 2/3 pitch
Rotor | Direct coupled, flexible disc
Insulation system | Class H per NEMA MG1-1.65
Standard temperature rise | 120 °C (248 °F) standby
Exciter type | Torque match (shunt) with PMG as option
Alternator cooling | Direct drive centrifugal blower
AC waveform total harmonic distortion | < 5% no load to full linear load, < 3% for any single harmonic
Telephone influence factor (TIF) | < 50 per NEMA MG1-22.43
Telephone harmonic factor (THF) | < 3%

Generator set options

- Fuel tanks
  - Basic fuel tanks
  - Regional fuel tanks
- Engine
  - Engine air cleaner – normal or heavy duty
  - Shut down – low oil pressure
  - Extension – oil drain
  - Engine oil heater
- Alternator
  - 120 °C temperature rise alternator
  - 105 °C temperature rise alternator
  - PMG excitation
- Alternator heater, 120V
- Reconnectable full 1 phase output alternator
- Control
- AC output analog meters
- Stop switch – emergency
- Auxiliary output relays (2)
- Auxiliary configurable signal inputs (8) and relay outputs (8)
- Electrical
  - One, two or three circuit breaker configurations
  - 80% rated circuit breakers
  - 80% or 100% rated LSI circuit breakers
  - Battery charger
- Enclosure
  - Aluminum enclosure Sound Level 1 or Level 2, sandstone or green color
  - Aluminum weather protective enclosure with muffler installed, green color
- Cooling system
  - Shutdown – low coolant level
  - Warning – low coolant level
- Extension – coolant drain
- Coolant heater options:
  - < 4 °C (40 °F) – cold weather
  - < -18 °C (0 °F) – extreme cold
- Exhaust system
  - Exhaust connector NPT
  - Exhaust muffler mounted
- Generator set application
  - Base barrier – elevated genset
  - Radiator outlet duct adapter
- Warranty
  - Base warranty – 2 year/400 hours, standby
  - Base warranty – 1 year/ unlimited hours, prime
  - 3 year standby warranty options
  - 5 year standby warranty options

Generator set accessories

- Coolant heater
- Battery heater kit
- Engine oil heater
- Remote control displays
- Auxiliary output relays (2)
- Auxiliary configurable signal inputs (8) and relay outputs (8)
- Annunciator – RS485
- Audible alarm
- Remote monitoring device – PowerCommand® 500/550
- Battery charger – stand-alone, 12V
- Circuit breakers
- Enclosure Sound Level 1 to Sound Level 2 upgrade kit
- Base barrier – elevated generator set
- Mufflers – industrial, residential or critical
- Alternator PMG excitation
- Alternator heater
Control system PowerCommand 2.3

**PowerCommand® 2.3 control** - An integrated generator set control system providing voltage regulation, engine protection and operator interface.

**Control** - Provides battery monitoring and testing features and smart-starting control system.

**InPower™** – PC-based service tool available for detailed diagnostics.

**PCCNet RS485** - Network interface (standard) to devices such as remote annunciator for NFPA 110 applications.

**Control boards** - Potted for environmental protection.

**Ambient operation** - Suitable for operation in ambient temperatures from -40°C to +70°C and altitudes to 13,000 feet (5,000 meters).

**AC Protection**
- AmpSentry protective relay
- Over current warning and shutdown
- Over and under voltage shutdown
- Over and under frequency shutdown
- Over excitation (loss of sensing) fault
- Field overload
- Overload warning
- Reverse kW shutdown
- Reverse VAR shutdown
- Short circuit protection

**Engine protection**
- Overspeed shutdown
- Low oil pressure warning and shutdown
- High coolant temperature warning and shutdown
- Low coolant level warning or shutdown
- Low coolant temperature warning
- High, low and weak battery voltage warning
- Fail to start (overcrank) shutdown
- Fail to crank shutdown
- Redundant start disconnect
- Cranking lockout
- Sensor failure indication
- Low fuel level warning or shutdown
- Emergency stop
- Fuel-in-rupture-basin warning or shutdown

**Operator/display panel**
- Manual off switch
- 320 x 240 Pixels graphic LED backlight LCD with push button access for viewing engine and alternator data and providing setup, controls, and adjustments (English, Spanish, or French).
- LED lamps indicating genset running, not in auto, common warning, common shutdown, manual run mode and remote start
- Suitable for operation in ambient temperatures from -20°C to +70°C

**Alternator data**
- Line-to-line and Line-to-neutral AC volts
- 3-phase AC current
- Frequency
- kVA, kW, power factor

**Engine data**
- DC voltage
- Lube oil pressure
- Coolant temperature

**Other data**
- Generator set model data
- Start attempts, starts, running hours
- Fault history
- RS485 Modbus® interface
- Data logging and fault simulation (requires InPower™ service tool)

**Digital voltage regulation**
- Integrated digital electronic voltage regulator
- 3-phase line-to-line sensing
- Configurable torque matching
- Fault current regulation under single or three phase fault conditions

**Control functions**
- Time delay start and cooldown
- Cycle cranking
- PCCNet interface
- (2) Configurable inputs
- (2) Configurable outputs
- Remote emergency stop
- Automatic transfer switch (ATS) control
- Generator set exercise, field adjustable

**Options**
- Auxiliary output relays (2)
- Remote annunciator with (3) configurable inputs and (4) configurable outputs
- PMG alternator excitation
- PowerCommand 500/550 for remote monitoring and alarm notification (accessory)
- Auxiliary, configurable signal inputs (8) and configurable relay outputs (8)
- AC output analog meters (bargraph)
  - Color-coded graphical display of:
    - 3-phase AC voltage
    - 3-phase current
    - Frequency
    - kVA
- Remote operator panel
Ratings definitions

Emergency standby power (ESP):
Applicable for supplying power to varying electrical load for the duration of power interruption of a reliable utility source. Emergency Standby Power (ESP) is in accordance with ISO 8528. Fuel Stop power in accordance with ISO 3046, AS 2789, DIN 6271 and BS 5514.

Limited-time running power (LTP):
Applicable for supplying power to a constant electrical load for limited hours. Limited Time Running Power (LTP) is in accordance with ISO 8528.

Prime power (PRP):
Applicable for supplying power to varying electrical load for unlimited hours. Prime Power (PRP) is in accordance with ISO 8528. Ten percent overload capability is available in accordance with ISO 3046, AS 2789, DIN 6271 and BS 5514.

Base load (continuous) power (COP):
Applicable for supplying power continuously to a constant electrical load for unlimited hours. Continuous Power (COP) in accordance with ISO 8528, ISO 3046, AS 2789, DIN 6271 and BS 5514.
