

# Factory Training

Government Customers

# Commitment to Excellence

State-side or deployed overseas, your backup and primary power solution simply has to work. Our Government Training Program is open to all branches of the military and all US Federal Government Departments and Agencies.

Cummins knows how important it is to have qualified technicians maintaining and operating your equipment. Our training programs ensure that every student receives the most comprehensive training available on equipment they will actually use.

For decades Cummins has been a trusted partner with the U.S. Government. Our services and prices are guaranteed.

For more than 90 years Cummins Inc. has maintained a commitment to excellence in engineering and support. We are the gold standard for quality and reliability. Our on-line tools, technical support engineers and a reliable global network of certified repair technicians set the standard for customer service excellence.

Our factory, located in Minneapolis (Fridley) Minnesota, provides the perfect backdrop to actively engage the skills students learn. The Technical Training Center is 40,000 sq feet of dedicated space and houses state-of-the-art equipment and tools. Cummins technical trainers have more than 40 years of combined experience working with Cummins Onan™ and Cummins Power Generation products.

Francis Bye - Technical Trainer

*You simply won't find anyone more qualified!*

Training is open to all branches of the military and federal government.

Training is balanced between classroom theory instruction and hands on.

We use simulation software and actual hardware. Rest assured that every student leaves training with certification level knowledge of our products.

Performance you can rely on™
