FLEXIBILITY TO EXPLORE YOUR PASSIONS

2021 REPOWER RETURN-TO-WORK PROGRAM OPPORTUNITY

The Cummins Inc. RePower Program is a paid returnship developed in partnership with SWE + iRelaunch as part of the STEM Re-entry Task Force Pilot. The program provides an opportunity for those who have been out of the workforce for at least two years, and allows them to re-engage their skills to re-power their career.

Our six month paid returnship provides participants with projects that match interests, expertise and abilities. A focus of our program is training, coaching, and development, as well as networking events. For successful participants, we are prepared to offer full-time employment.

Qualifications and requirements

» Currently on a career break of 2+ years

» 5+ years of experience in a relevant IT or engineering role, the engine technology industry or relevant area

» Information technology, mechanical, chemical, electrical, industrial, manufacturing engineering degree or engineering-related degree

» Interest in returning to the workforce full-time

» Excellent leadership and communication skills

» Strong problem-solving and analytical skills

» Program placements will be based on applicants' skills, experience and interests

Target timeframe of RePower Return-to-Work Program

September 2021
