

Cummins Air Filter

Introduction

According to Article 33 (Duty to communicate information on substances in articles) of the REACH regulation, EU REACH Regulation 1907/2006 (and UK equivalent), *“Any supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0,1% weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance.”*.

Declaration of Use of Candidate List substances in Products

Cummins works actively to avoid and phase out Prohibited Substances in its products. See more information on Prohibited Substances on the [Prohibited Substances](#) page at public.cummins.com.

Under REACH, an air filter is considered a complex object because it is made up of more than one article. On a complex object level, the air filter does not contain any Candidate List substance of a concentration above 0.1% by article weight. However, constituent articles (sub-components) may contain such concentrations.

This declaration covers all variants of the air filter. Cummins air filter sub-components do not contain any Candidate List substance of a concentration above 0.1% by sub-component weight.

Change Log

Issue 1: Initial release, dated 9-28-21.

Issue 2: Removal of CAS 123-77-3 as a substance found in air filters. Issue dated 2-11-22.
