

Returning Waste Batteries

As a producer of industrial batteries under the Waste Batteries and Accumulators Regulations 2009, Cummins Electrified Power produces lithium-ion batteries. In certain countries (including but not limited to the United Kingdom), Cummins is obliged to take back free of charge, waste industrial batteries supplied to an end user for treatment and recycling. Cummins will do this in any calendar year it places new industrial batteries in the relevant market and as required by law. If any customers of Cummins Electrified Power, or in certain cases other end users, require Cummins to take back industrial batteries, please contact wastebatteries@cummins.com. Cummins will make the necessary arrangements for the return, proper treatment and recycling of the waste industrial batteries in relevant markets.
